

Open Your Sustainable Future with JASE-World

Japanese Business Alliance for Smart Energy Worldwide

Toward Decarbonized World

As the climate crisis becomes a worldwide crucial challenge, Japanese companies need to contribute to global decarbonization by actively spreading their excellent energy-efficient and innovative renewable technologies and products abroad. The government of Japan also encourages this movement toward cleaner energy transition and carbon neutrality in Asia and the world.

The Japanese Business Alliance for Smart Energy Worldwide (JASE-W) was established to carry out overseas decarbonization projects and businesses through collaboration among member companies and the government.

Activities

JASE-W establishes Working Groups (WG) to create and implement innovative ideas and best solutions in the energy field.

Working Groups

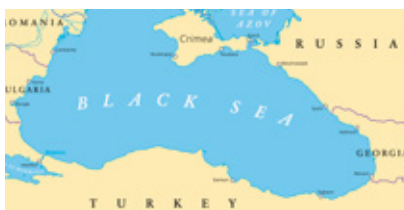

Zero Energy Building (ZEB) Solutions

Accelerating the ZEB concept and appeal to a step-by-step approach for promoting ZEB is important

Renewables and Distributed Power

Deploying greener and decarbonized integrated power supply systems by introducing renewables

Turkey and the Black Sea Region

Investigating projects in major cities around the Black Sea where rapid energy transition is necessary and progressing

Geothermal Power Generation

Formulating a development strategy toward countries rich in geothermal resources

Electric Power and Thermal Management

Facilitate fuel conversion from coal/oil to natural gas and introduction of cogeneration systems

Power Grid Improvement

Constructing of robust, highly efficient, and cleaner next-generation electric power transmission networks

Waste to Energy

Accelerating Japanese advanced garbage incinerator plant technologies

Water Technologies

Development of Japan's excellent water treatment and hydro infrastructure technologies and equipment

Energy Business Matching Opportunities

JASE-W comprehensively and practically supports the development of energy-saving businesses of Japanese companies, such as dispatching member companies on missions, holding business forums in target countries and participating in international energy exhibitions.

Joint public and private mission to Indonesia

Vietnam-Japan Energy Conservation Forum

World Future Energy Summit (Exhibition)

Create "Japan Brand" in Smart Energy Business

JASE-W has been publishing "Japanese Smart Energy Products & Technologies" for members and has posted it on its website.

It has been distributed widely at various occasions such as ministerial-level meetings and forums.
